

HYDRAMASTER CORPORATION:

Bringing the Heat

Carpet cleaning technicians want a powerhouse to do their job, and the Titan 575™ from HydraMaster is the powerhouse of truckmount carpet extractors.

The Titan 575 allows techs to run two wands at once so big cleaning jobs get done faster.

Incorporating the industry's first true water-conservation system, the Titan 575 can be inactive under a full vacuum load for as long as 40 minutes without dumping fresh water. This means techs can move furniture or apply preconditioners to carpets without shutting off the machine. And hot water is used for the job, not dumped into the recovery tank, saving precious fuel every day.

Take a look at these additional features:

- A 31 HP Daihatsu, fuel-efficient, liquid-cooled engine
- A Dominator 4007 Tri-Lobe vacuum blower — an exclusive with HydraMaster
- Up to 1,200 PSI heated water for carpet cleaning and up to 2,000 psi non-heated water for pressure washing
- Consistent heat up to 250° F
- Extreme water recovery for fast drying times
- Adjustable temperature and speed for low-heat applications
- Sight windows to keep tabs on oil levels
- Last-step chemical injection for reduced scale buildup.

And, the 575 does not require a specialized muffler or catalytic converter system. It is designed with a muffler/catalytic converter as one unit, which also makes the 575 not only a powerhouse but a surprisingly quiet one as well.
