

Meets EPA's New Lead RRP Regulations

By AlturaSolutions Communications

Dated: Jul 14, 2010

EPA's new Lead RRP regulations require contractors performing renovations, repairs, or painting projects in facilities built before 1978 to use HEPA-filtered vacuum cleaners, such as Tornado Industries' CVF 125.

EPA's new Lead RRP regulations require contractors performing renovations, repairs, or painting projects in facilities built before 1978 to use HEPA-filtered vacuum cleaners, such as Tornado Industries' CVF 125.

This vacuum can collect and contain lead particulates in these work areas.

The CVF 125 (which stands for critical filtration vacuum) is designed for heavy-duty, industrial use.

The systems has a powerful four-stage filtration system with HEPA filter, so it can thoroughly and efficiently collect and trap contaminants such as lead, keeping the indoor environment safe and healthy.
