

“New Generation” of CFR Carpet Cleaning System Announced

By AlturaSolutions Communications

Dated: Aug 04, 2010

Tacony Corporation, a leading manufacturer of professional cleaning tools and equipment, announces that a “new generation” of CFR (Continuous Flow Recycling) carpet cleaning extractors will be unveiled August 4, 2010.

Chicago, IL – August 4, 2010 - Tacony Corporation, a leading manufacturer of professional cleaning tools and equipment, announces that a “new generation” of CFR (Continuous Flow Recycling) carpet cleaning extractors will be unveiled today to distributors and end-users throughout the janitor industry.

The line includes four different carpet cleaning systems. Michael Schaffer, President of Tornado® Industries (also a Tacony company), is in charge of the introduction of CFR’s new generation of products.

Continuous Flow Recycling technology is designed to provide advanced moisture-controlled cleaning, faster drying times, and increased cleaning productivity when compared to conventional carpet extractors.

According to Schaffer, “This ‘new generation’ of CFR products includes some of the most sustainable and environmentally responsible systems ever developed for the carpet cleaning industry.”

These new systems offer two key features that separate them from other portable carpet extractors on the market:

- They filter and recycle water and cleaning solution as the machine is used, allowing them to use up to 85 percent less water than comparable extractors.
- They use moisture-controlled wand technology, providing up to 50 percent more moisture recovery than many comparable systems.

Schaffer adds that with today’s emphasis on Green cleaning, sustainability, and water conservation, this new generation of CFR extractors “are the right products at the right time.”

-end-

###

About CFR, a Tacony Company

CFR designs and manufactures a complete range of eco-friendly carpet cleaning systems and high-performance specialty tools with an innovative, patented technology that is radically different from other carpet cleaning systems. Continuous Flow Recycling (CFR) technology provides superior moisture-controlled cleaning, faster drying times, and unmatched productivity compared to other extractors on the market today. With a state-of-the-art recycling filtration system that is coupled with moisture-controlled atomization wand technology to minimize carpet moisture, CFR is the Greenest carpet cleaning system in the industry today.
