Learn from the Winners....

To get ahead, learn from the winners...like the 10-time World Series champions, the St. Louis Cardinals.

When the Cardinals decided to select a new carpet extractor, they had scores of machines to choose from.

However, after doing their homework, they settled on one machine that has proven itself effective, high performing, Green and sustainable: the CFR PRO 500.

The CFR system is unlike any other in the industry. Water and cleaning solution are filtered and recycled up to seven times before emptying. This improves worker productivity and reduces water and chemical use dramatically.

Further, its moisture-controlled wand technology is about the most advanced in the industry, recovering up to 50 percent more moisture than conventional wands so that carpets dry faster, stay healthier.

If it works for the Cardinals, it can work for a winner like you too.

About CFR, a Tacony Company

CFR designs and manufactures a complete range of eco-friendly carpet cleaning systems and high performance specialty tools with an innovative, patented technology that is radically different from other carpet cleaning systems. Continuous Flow Recycling (CFR) technology provides superior moisture-controlled cleaning, faster drying times, and increased cleaning productivity that is unmatched compared to standard carpet extractors on the market today. Through a state-of-the-art recycling filtration system, coupled with moisture-controlled atomization wand technology to minimize carpet moisture, CFR is the Greenest carpet cleaning system in the industry today.
