### Carpet Care: Learn from the Winners

[Company Website](#)

To get ahead, learn from the winners...like the 10-time World Series champions, the St. Louis Cardinals.

When the Cardinals decided to select a new carpet extractor, they had scores of machines to choose from.

However, after doing their homework, they settled on one machine that has proven itself effective, high performing, Green and sustainable: the CFR PRO 500.

The CFR system is unlike any other in the industry. Water and cleaning solution are filtered and recycled up to seven times before emptying. This improves worker productivity and reduces water and chemical use dramatically.

Further, its moisture-controlled wand technology is about the most advanced in the industry, recovering up to 50 percent more moisture than conventional wands so that carpets dry faster, stay healthier.

If it works for the Cardinals, it can work for a winner like you too.
