## This System Makes Measuring and Reporting Sustainability Easy

Business owners and facility managers know dashboard systems that measure, monitor, and report resource consumption against predetermined targets can help promote sustainability and cut costs.

But the problem with many of these systems is that they are so difficult to use.

Not so with the Sustainability Dashboard from Sustainability Dashboard Tools, LLC.

Designed for all types of facilities, users report it is one of the easiest-to-use dashboard systems available today.

What's more...it's accurate. The Sustainability Dashboard provides 95 percent accuracy at only 5 percent the cost of competitive products.

Stephen Ashkin is available for interviews, presentations, and commentary on Green Cleaning-related issues, sustainable buildings, industry trends, and facility management. He can be reached by calling (812) 332-7950.

About Sustainability Dashboard Tools, LLC.

Sustainability Dashboard Tools, LLC, has created a new Web service technology designed specifically for cleaning professionals. The company's CEO is Stephen Ashkin, President of The Ashkin Group and Executive Director of the Green Cleaning Network; its COO is Cynthia Schultz.

Sustainability Dashboard Tools' allows users to measure the natural resources their businesses use and the greenhouse gas emissions they generate. Armed with this information, businesses can make commonsense changes that reduce their impact on the environment. Such changes save businesses money and make them more efficient and competitive while also benefiting their facilities, employees, and local community as well as the environment.
