Edmar Joins Enviro-Solutions' Team

Enviro-Solutions added Edmar Cleaning Corp. as a new U.S. distributor.

Edmar, which has been in business for over 35 years, is a major distributor of cleaning equipment and supplies in the greater New York area. The company is well known for carrying an extensive, high-quality product line and having a "hands-on" sales force, helping clients address their cleaning needs.

"We reviewed several environmentally preferable product lines," says Harry Kovitz, CEO of Edmar. "We looked for products that would enhance our existing brand lines and perform as well or better than conventional cleaning chemicals. We selected Enviro-Solutions because they met these criteria."

According to Mike Sawchuk, Enviro-Solutions' VP and General Manager, Edmar's reputation for providing exemplary customer service was a standout feature that impressed him about this distributorship. "Our mutual customers will be able to get a complete offering of 'Green' cleaning products, professional local representation, and quality service."
