

Just Spray And Walk Away

Lots of manufacturers say their products help improve productivity.

But, how about a product that actually does virtually all the work and keeps on working after it has been applied?

That's the ultimate in enhanced worker productivity and what you get using ES 100, the all-new bio-active odor eliminator for wash-rooms developed by Enviro-Solutions.

Used on a regular basis, ES 100 binds to odor-causing molecules, neutralizing the odors within seconds of application.

And, it keeps on working for up to 80 hours after the application. Simply spray a mist on walls, fixtures or floors and let ES 100 do its magic.

ES 100 is safe, effective and proven green by EcoLogo.
