Encapsulation For Hard And Soft Floors

Enviro-Solutions has just introduced an encapsulation cleaner, ES93+, that has been recognized as safer for people and the environment by the U.S. Environmental Protection Agency's (EPA) Design for the Environment (DfE) program as well as earning the Seal of Approval (SOA) from the Carpet and Rug Institute (CRI).

Along with cleaning and spotting for carpets, ES93+ can be used to clean grout and tile floors, which can be difficult to clean.

ES93+ breaks down soils to become a fine powder that is then easily removed with regular vacuuming or mopping.

Carpets come out clean and healthy, leaving no residue, which helps resist resoiling.
