

Kills MRSA and Approved for Hospital Use

The news reports are everywhere. "School officials warn parents of recent cases of MRSA. Several students have been diagnosed with it."

Fortunately, Enviro-Solutions has two very effective neutral cleaner/disinfectants—ES 64 and ES 256—so powerful they kill the bacteria that causes MRSA (Methicillin-resistant Staphylococcus aureus) as well as 30 other types of bacteria, fungi, and viruses. Even more, they are approved for hospital use.

No rinsing necessary, these cleaner/disinfectants deodorize as well, all in one step.

Use ES 64 and ES 256 as instructed to clean and disinfect walls, floors, toilets, urinals, and counters and to clean toilets and urinals; no rinsing is necessary.

For more information, visit Enviro-Solutions at www.enviro-solution.com, and click on the Product Selection section or Resource Center/Technical Reports and Presentations (section "1d") for more product information, or call toll-free: 877-674-4373.
