

## Sustainability Letter

Enviro-Solutions is a pioneer, specialist, and leader in Green cleaning products. Since 1994, this Canadian ISO-9001-registered company has exclusively manufactured and marketed a complete line of cleaning products that have been independently certified as effective, high performing, and Green. Certification also means the products are proved safer for the environment and users as well as occupants and visitors of the facilities being cleaned. What's more, they work as well as or better than traditional products.

Unlike many other companies, Enviro-Solutions does not offer just a few token Green products to complement traditional product lines. Instead, Enviro-Solutions offers a full and extensive Green product line of more than 70 products (300 SKUs)—one of the largest in the industry.

Enviro-Solutions' Green product line includes 40 products certified Green by Environment Canada's EcoLogo Program (ECP) and 12 by the U.S.-based Green Seal Program. In addition, Enviro-Solutions has a number of products approved by the Carpet and Rug Institute (CRI), various states, and the British Columbia Building Corporation. And still more are endorsed by organizations such as INFORM, the Center for a New American Dream, and LEED.

While many companies employ "ecobabble" or "greenwashing" tactics by self-proclaiming their products Green when in fact they are not, Enviro-Solutions separates itself from the rest by providing proof of its claims from independent, third-party organizations. As further evidence of the quality of its Green products, Enviro-Solutions boasts many major customers, and some have been customers using the company's environmentally preferable cleaning products for as long as the Enviro-Solutions has been in business! By the way...There is no other major manufacturer in the cleaning industry that can make the claim.

Some of these clients include:

- Vancouver Parks
- The University of British Columbia (UBC)
- Vancouver Aquarium
- Delta Hotel—  
Downtown Vancouver
- Cities of Markham  
Ontario and Fredericton NB
- McGill University and McGill University Health Center
- Pepsico World Headquarters
- Quaker Oats World Headquarters
- Reader's Digest Corporate Head Office

- Ontario Power Generation (Ontario Hydro)

**Welcome to the Enviro-Solutions Website!**

Our goal is to offer products which are superior from an environmental and health & safety perspective. These are products that:

- Will compete with conventional cleaning products on both performance and price.
- Are safer for both the user and the workplace environment.
- Will clean our world without harming Nature's balance.
