## Green & Clean

### High-Traffic Floor Finish is UL approved for slip resistance.

**June 16, 2010** - Easy to clean and maintain, ES 96 high-traffic floor finish provides stain and heel mark resistance. It is also designed to be occasionally burnished using ultra-high-speed burnishing systems. Floor finish dries quickly and requires only 15 min between coats.

**Contacts:** [View detailed contact information.](#)

### Long-Lasting High-Traffic Floor Finish

---

#### Original Press Release

#### Enviro-Solutions Ltd

2060 Fisher Dr.

Peterborough, ON, K9J8N4, Canada

Keeping the shine on high-traffic floor areas can be a real challenge. But now it's easier than ever with ES 96, the high-traffic floor finish from Enviro-Solutions.

ES 96 is durable, providing exceptional stain and heel mark resistance.

Easy to clean and maintain, ES 96 is also designed to be occasionally burnished using ultra-high-speed burnishing systems.

Worker productivity is also enhanced because ES 96 dries quickly and requires only 15 minutes between coats. And ES 96 is UL approved for slip resistance.

To view a demonstration of ES96, click here:

## Green & Clean

### Eco-Friendly LED Luminaire is rated for hazardous locations.

[Click Here to Enlarge Picture](#)

**June 16, 2010** - Providing instant-on lighting and silent operation, Mercmaster® enclosed and gasketed LED luminaire operates from 120-277 V, 50/60 Hz supply. NEMA 4X housing and guards/mounting hoods that are copper-free cast aluminum protected by epoxy powder coat allow luminaire to withstand punishing weather, salt water, corrosive chemicals, and high ambient temperatures. All exposed hardware is stainless steel, and fixture's construction is free of any hazardous materials, including mercury.

**Contacts:** [View detailed contact information.](#)

## **Appleton Mercmaster® LED is Maintenance-Free, Energy-efficient Alternative to HID and Fluorescent Light Fixtures**

---

### **Original Press Release**

#### **Appleton**

9377 W. Higgins Road

Rosemont, IL, 60018, USA

-- Next Generation of Eco-Friendly Appleton Luminaires is Rated for Hazardous Industrial Locations --

ROSEMONT, IL -- Appleton, the global leader in hazardous location electrical equipment, is offering an energy-efficient alternative to traditional HID and high-intensity fluorescent lighting with its new Mercmaster® enclosed and gasketed LED luminaire, the company's first LED (light emitting diode) fixture. The new Mercmaster brings LED technology's many benefits to industrial, marine and heavy commercial customers.

"Appleton is taking a leadership role in making industrial-grade lighting more environmentally responsible with LED fixtures that minimize energy usage without compromising brightness, efficacy or worker safety," said Steve Henry, Senior Marketing Manager, Appleton Electric. "Our customers will experience considerable labor- and cost-savings associated with the LED's 60,000 hour service life, while enjoying the convenience of instant-on lighting and silent operation."

The Mercmaster LED features a compact, extremely low-profile that is ideal for installation in low clearance areas. Suggested applications include: hazardous and non-hazardous locations in oil refineries, pulp and paper mills, foundries, general manufacturing plants, and marinas. The fixture is rated by the NEC as Class I, Div. 2, and Class 1, Zone 2.

## SUPERIOR LIGHTING

Unlike HIDs that requires a reflector to control light direction, the LED precisely directs its light to where it is needed most without the use of external optics, resulting in efficiencies up to 80 percent. In comparative photometric testing, the Appleton LED scored significantly higher than two leading competitors at mounting heights from 10 to 20 feet.

## RUGGED PERFORMANCE

The NEMA 4X rated housing, guards and mounting hoods are copper-free cast aluminum protected by an epoxy powder coat, a combination that results in a unit that can withstand punishing weather, salt water, corrosive chemicals, and high ambient temperatures. All exposed hardware is stainless steel, and the fixture's construction is free of any hazardous materials, including mercury. Hinge and bolt construction assures 360° compression at all points on the ballast housing gasket for positive sealing.

In addition, the fixture's aluminum heat sink dissipates heat more effectively than standard steel, while its threaded polycarbonate lens better safeguards the LED cluster than the glass lenses deployed in competitor's fixtures. Another performance benefit of LEDs is that they feature no filament that can be damaged by vibrations or sudden shocks, further reducing the need for maintenance.

## SIMPLE INSTALLATION

Modular engineering presents users with a high level of design flexibility. Scores of component can be paired seamlessly together to assure unique requirements are meet. This versatility is matched by safety features such as the rounded edges found on the heat sink that prevent potential injuries, and an extra-high hinge that provides additional protection against accidental ballast housing disengagement during installation or maintenance. Access to the LEDs can be achieved by merely unthreading the polycarbonate globe. To service either the array or the driver, simply unplug one from the other.

The Appleton Mercmaster LED standard input voltage requirement is a range of 120V through 277V, 50/60 Hz. For more details, please visit [www.appletonelec.com](http://www.appletonelec.com).

About Appleton

Appleton is a premium line of hazardous location products under the EGS Electrical Group family of brands. EGS Electrical Group is a worldwide manufacturer of electrical products for virtually every type of environment. Distributors, contractors, engineers, electricians and site maintenance professionals around the world trust EGS brands to make electrical installations safer, more productive and more reliable. EGS is organized into three focused businesses that provide distributors and end-users expert knowledge and excellent service. It is part of the EGS Electrical Group, LLC, a division of Emerson Industrial Automation and is headquartered in Rosemont, IL.

### General-Purpose Cutting Oil is petroleum- and additive-free.

[Click Here to Enlarge Picture](#)

**June 16, 2010** - Based on renewable vegetable formulation, SHO-500 cutting oil provides oxidation stability and is suited for honing applications where additives cannot be used, such as nuclear and some aerospace parts. Available in 5 gal pails, 55 gal drums, and 330 gal totes, oil can be used with conventional vitrified honing abrasives and metal-bond super abrasives.

**Contacts:** [View detailed contact information.](#)

## **New Renewable/Sustainable Honing Oil Offers Extended Service**

---

### **Original Press Release**

#### **Sunnen Products Co.**

7910 Manchester Ave.

St. Louis, MO, 63143, USA

Petroleum-free, vegetable-based cutting oil is additive-free, ideal for general use.

Sunnen meets contemporary needs for planet friendly industrial consumables with the introduction of SHO-500, a long-lived general-purpose honing fluid based on a renewable vegetable formulation that makes sustainable metalworking affordable and practical. Offering a breakthrough in oxidation stability, SHO-500 is formulated without additives that many find objectionable, such as sulfur, chlorine and fluorine. It is an ideal solution in honing applications where additives cannot be used, such as nuclear and some aerospace parts, or where company policies discourage use of fluids with such additives. SHO-500 is acceptable in all parts of the world and to all religions and cultures. It is suitable for use with conventional vitrified honing abrasives and metal-bond superabrasives. SHO-500 joins Sunnen's two other planet friendly oils, MAN-863 and KG3X, which are listed as BioPreferred(TM) products by the U.S. Department of Agriculture. The new oil is available in 5-gallon (18.9 l) pails, 55-gallon (208.2 l) drums and 330-gallon (1,249 l) totes.

### LED High Bay Fixture is classified for hazardous locations.

**June 15, 2010** - SafeSite® LED High Bay for Hazardous Locations (Hazloc) luminaire can replace conventional high bay fixtures in hazardous locations. Offering consistent light output performance for up to 10 years, fixture minimizes maintenance as well as dangers associated with bulb changes. Unit incorporates Cree XLamp® XP-G LEDs that provide up to 10,000 lm at 150 W total power consumption. Also, power factor greater than .95 reduces stand-by energy consumption.

**Contacts:** [View detailed contact information.](#)

### Dialight Introduces First SafeSite® LED High Bay Fixture Classified for Hazardous Locations

---

**Original Press Release**

**Dialight Corp.**

1501 Route 34 South

Farmingdale, NJ, 07727, USA

First of Its Kind High-Bay Luminaire Delivers 67 Lumens per Watt, Reduces Energy Consumption, Maintenance Costs for Wide Range of Industrial, Petrochemical and Other Rugged Applications.

Farmingdale, NJ - Dialight (LSE: DIA.L), an innovative global leader in LED lighting technology, today announced the debut of its new SafeSite® LED High Bay Fixtures for Hazardous Locations (Hazloc). A breakthrough in LED industrial lighting technology, the SafeSite LED High Bay luminaire is designed specifically to replace conventional high bay fixtures in hazardous locations, including gas facilities, oil refineries, chemical and processing plants, paper/pulp mills, waste and sewage treatment facilities.

Offering exceptional light output performance for up to 10 years, SafeSite LED High Bay Hazloc fixtures significantly reduce maintenance, eliminating the costly and sometimes dangerous bulb changes regularly required for traditional HID fixtures. Backed by Dialight's five-year warranty, SafeSite Hazloc LED High Bay fixtures offer outstanding reliability and safety, with offering a T5 temperature code at -40F to +149F (-40C to +65C).

Dialight's SafeSite LED High Bay fixture is the first of its kind to achieve NEC certification to the following hazardous location codes:

UL-844: UL-8750

Class I, Div 1 CSA 22.2 #137

Class I, Div 2 IP66

Class II, Div 1

Class II, Div 2

Class III, Div 1

Class III, Div 2

The Dialight SafeSite High Bay fixture incorporates Cree's XLamp® XP-G LEDs and delivers unprecedented energy efficiency with four different models providing up to 10,000 lumens at just 150W total power consumption. An exceptional power factor

greater than .95 further reduces stand-by energy consumption. NEC certified for use in the most extreme conditions, including petroleum refineries, drilling platforms and fuel service and handling areas, the SafeSite LED High Bay fixtures provide crisp, clear, white light for maximum visibility and safety in virtually any harsh environment, including marine locations.

"Our SafeSite High Bay fixture is the most durable, energy-efficient device approved for hazardous locations on the market," said Roy Burton, Dialight's Group Chief Executive. "These classified approved fixtures allow hazardous site operators to realize all the benefits of LED technology, including dramatically reduced energy consumption, less environmental impact and lower maintenance costs, with a bright white light for maximum visual acuity and safety."

Conventional operating voltage makes change out from traditional high- or low-pressure sodium, metal halide or mercury vapor fixtures to SafeSite LED fixtures quick, safe and easy using existing wiring. The SafeSite Hazloc fixtures' lightweight, low-profile design is about half the weight and 75% shorter than conventional fixtures, allowing for increased mounting versatility and ease of installation.

Instant on/off operation enhances safety, while shock and vibration resistant construction ensures durability in the most unforgiving environments. Mercury-free LEDs are recyclable, eliminating the costly handling and disposal fees commonly required for traditional bulbs.

"These highly-efficient fixtures not only help cut operating and maintenance costs, but also align perfectly with our customers' sustainability initiatives, providing a greener, money-saving solution to hazloc lighting," Burton said. "They're even approved by the International Dark-Sky Association for their light pollution reduction characteristics."

SafeSite LED High Bay hazloc fixtures are available through Dialight's global network of authorized distributors. For more information, visit [www.dialight.com](http://www.dialight.com).

# This Green Dishwashing Liquid Really Is Green

---

## Original Press Release

### Enviro-Solutions Ltd

2060 Fisher Dr.

Peterborough, ON, K9J8N4, Canada

Enviro-Solutions introduces ES 79+, a foamy, green-colored, environmentally preferable hand-dishwashing detergent designed for light, regular, and heavy-duty use in commercial foodservice settings.

ES 79+ is certified and proved Green by EcoLogo.(TM) It cuts grease and grime on dishes, utensils, pots, and pans; easily rinses away, providing streak-free results; and yet is surprisingly gentle to hands.

And along with being Green, ES 79+ is sustainable. Bottles and packaging are made from recycled materials, and ingredients are naturally based and renewable.\*

\*Wherever possible; recycled content may vary.

### About Enviro-Solutions

Enviro-Solutions is a leading manufacturer of environmentally preferable cleaning products. An ISO-9001 certified company, Enviro-Solutions was established in 1994 with very focused goals: To develop and market a superior line of environmentally preferable cleaning products and solutions. Using advanced technology, the company manufactures products that offer proven safety, health, and environment benefits without sacrificing product performance and are competitively in price.

## Green & Clean

### Cleaner/Disinfectant kills microbes, germs, and bacteria.

[Click Here to Enlarge Picture](#)

**October 27, 2009** - EPA-registered, Health Canada (DIN) approved, environmentally responsible, ES 64 kills influenza A, MRSA, and HIV. Dual-quat product comes with neutral pH, and is nonylphenol ethoxylates free. Hospital use approved product is supplied in closed dispensing packaging to avoid user contact as well as protecting environment.

Additional information provided by manufacturer

**Contacts:** [View detailed contact information.](#)

## Let's Get Technical

---

### Original Press Release

#### **Enviro-Solutions Ltd**

2060 Fisher Dr.

Peterborough, ON, K9J8N4, Canada

ES 64 is an EPA-registered, Health Canada (DIN) approved, environmentally responsible, highly effective cleaner/disinfectant with a broad kill claim-influenza A, MRSA, HIV, and many more.

In fact, it is effective at eliminating more microbes, germs and bacteria than many other disinfectants.

Hospital use approved, ES 64 is a dual-quat product, with a neutral pH, and is nonylphenol ethoxylates free.

For added protection, ES 64 is supplied in "closed" dispensing packaging, reducing the likelihood that concentrate will come into user contact and protecting the environment as well.

For more information, visit [www.enviro-solution.com](http://www.enviro-solution.com), or call toll-free: 877-674-4373.

## Freestanding Dispenser suits all types of cleaning chemicals.

**July 16, 2009** - With flow rate of up to 20 gpm, Fast Fill Station can fill 100 gal tank in just 5 min. Self-contained steel rack system features automatic shutoff that stops flow when tank is full, and has preset metering system for consistent dilution rate. With no electricity needed for operation, unit can be placed anywhere it is needed.

Freestanding Dispenser suits all types of cleaning chemicals.

## The Fast Fill Station

Enviro-Solutions introduces the Fast Fill Station.

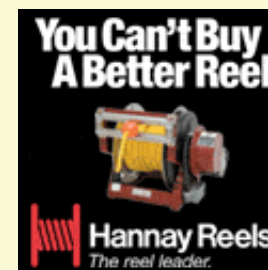

This heavy-duty, self-contained, freestanding, steel rack system fills four times faster than conventional dispensers.

With a flow rate of up to 20 gallons per minute, you can fill a 100-gallon tank in just five minutes.

Use it for virtually all types of cleaning chemicals.

The preset metering system ensures consistent dilution rate, and an automatic shutoff stops the flow when the tank is full.

The Fast Fill Station minimizes chemical contact, promoting
