### **Carpet Care: It's All About the Heat**

#### [Company Website](#)

Letters and praise about HydraMaster's Boxxer 421 continue to pour in. Carpet cleaning techs all over North America find one thing or another that impresses them about the machine.

But looking through all the letters, one thing—in fact one word—keeps popping up: heat.

Letter after letter praises the Boxxer 421's Advanced Heat Exchanger System, saying it is a quick, consistent, and reliable solution heating system.

"I've never seen this kind of heat," says Gene Duka, A-Plus Carpet Care, near Sacramento, California.

"The Boxxer has quick, strong, consistent heat, running at 230 to 240 degrees," comments Sergio Gonzales in Jacksonville, Oregon.

"The heat-up time is phenomenal. The Boxxer goes from the start to heat in mere minutes [and] holds up for literally hours," according to Michael Wise, Charleston, South Carolina

And a writer from Crown Cleaning in Florida says, "I just turn up the heat... look out soiled carpets!"
