## Press Release

### **Kaivac, Inc.**

Release date: January 29, 2008

#### **Kaivac Awarded New Patent for KaiSump Machine**

Hamilton, OH-January 29, 2008-Kaivac, inventors of the No-Touch Cleaning(TM) system has just been awarded a U.S. Patent, USPN 7,316,049, for their KaiSump(TM) system.

The KaiSump is used primarily to convert a No-Touch Cleaning machine into a 'continuous' disaster and flood recovery system," according to Matt Morrison, communications manager for Kaivac.

For instance, in a flood situation, once the KaiSump discharge line is secured to an acceptable drain (e.g., sink, toilet, outside, etc.), the machine provides a continuous pump-out operation that saves critical time during flood recovery and also helps reduce labor costs and minimize building damage.

After the water is removed, the No-Touch Cleaning system can be used for final clean up, minimizing the worker's exposure to bacterial contamination.

"This kind of capability is typically found only in expensive single-purpose machines." says Matt Morrison,. "We're delivering it as an inexpensive add-on to our No-Touch Cleaning(TM) systems as just one more way we help our customers stretch their maintenance

**PIPE CLEANING SOLUTIONS**

- Sewer cleaning equipment
- Storm water cleaning
- Drain cleaning

dollars."

Morrison adds that the machine is so effective that some people have even used it to empty swimming pools.

"We are very proud of our inventions and our contribution the professional cleaning industry," adds Morrison. "The KaiSump reflects our company's ongoing commitment to our industry and helping its members meet their cleaning challenges."

The President of Kaivac, Robert Robinson Sr., who has been in the jansan industry for more than a decade is available to discuss jansan industry issues and trends. He may be reached by calling: 800-287-1136

About Kaivac Headquartered in Hamilton, OH, and the originator of No-Touch Cleaning(TM) system, Kaivac, Inc., manufactures a full line of No-Touch cleaning products aimed at making cleaning processes safer for people and the environment while preserving quality and cost efficiency.
