KaiVac 1215 and 1250 No-Touch Cleaning Systems

Share Like

No-Touch Cleaning Systems  
KaiVac Inc.

[Web site](#) | [company information](#)

The KaiVac 1215 and 1250 machines are the smallest No-Touch Cleaning systems the company has ever developed. The machines feature 500 psi or 150 psi to thoroughly remove surface soils and contaminants. Studies have shown cleaning machines to be 60 times more effective than mop and bucket cleaning at reducing bacterial contamination from floor surfaces.
