Manufacturer Decides to Accessorize ***Mantra: Do More for Less***

Hamilton, OH - April 12, 2011 - [Kaivac Inc.](#), developers of the [No-Touch Cleaning® system](#), is introducing a number of cleaning tools and accessories that attach to the KaiVac systems, allowing facility service providers to clean more effectively at a reduced cost.

The new accessories allow users to perform a multitude of tasks and clean just about any surface in a facility, from tile and grout to baseboards and stairwells. They can also be used for stripping floors and carpet spotting.

According to Tom Morrison, vice president of marketing for Kaivac, the systems all have two things in common:

- They are designed to improve cleaning performance
- They are all relatively inexpensive.

"We are responding to our end-customers needs," he says. "Due to the economy they are asking for inexpensive cleaning tools that can help them do more [with the KaiVac systems] for less."

In fact, Morrison adds, "do more for less" actually became the "mantra" for the Kaivac engineering department.

Among the accessories being introduced are the following:

- [The Gatling Gun™ Grouter](#), a high-speed rotary nozzle that simultaneously power washes and vacuums up soils and contaminants from floors;

- [The Gatling Spray Gun](#) and [Gatling Gun Lance](#), a special nozzle and nozzle extension designed for high-speed rotary cleaning, which can be used without cleaning agents;

- [Ten-inch Vacuum Head](#), designed for wet vacuuming hard-to-reach floor areas but can also be used to clean countertops and other flat surfaces;
- [Squeegee Brush Head](#), includes bristled floor brush on one side to eliminate time wasted changing tools while vacuuming floors; and
- [Wand-mounted Mohawk Grout Brush](#), for cleaning grout lines when wet vacuuming.

"Although each accessory is intended to perform a specific cleaning task, we expect end-users will find they can be used for a variety of cleaning duties," adds Morrison. "This is what we want. We want them to be able to do more for less."

###

About Kaivac, Inc.

Headquartered in Hamilton, Ohio, Kaivac, Inc. delivers complete science-based cleaning systems designed to produce healthy results and outcomes while raising the value of cleaning operations and the professionalism of the worker. The originator of [No-Touch Cleaning](#)[®], Kaivac offers an integrated portfolio of environmentally friendly cleaning products designed to remove the maximum amount of soil and potentially harmful biopollutants in the most cost-effective manner possible. For more information, visit www.kaivac.com.

About No-Touch Cleaning®

Designed to remove the maximum amount of soil, bacteria, and other biopollution, Kaivac's patented No-Touch Cleaning systems combine an indoor pressure washer, a powerful wet vacuum and chemistry into an integrated system. Empowering workers to hygienically clean without touching contaminated surfaces, these systems not only clean better, but also cut labor, chemical, and equipment costs while raising worker morale and image. In fact, studies show that Kaivac's No-Touch Cleaning systems are 60 times more effective in reducing bacterial contamination on tile and grout surfaces than mops, which are more likely to spread contaminants than remove them.
