

Kaivac Awarded for Innovation

HAMILTON, OH -- Kaivac, Inc., manufacturer of the No-Touch Cleaning system, has been awarded a Manny Award for New Product Development and Innovation by a local business publication.

CincyBusiness, a business publications serving the Tri-State area of Ohio, Kentucky, and Indiana, highlights the accomplishments of some of the region's top manufacturing companies by honoring them with the Manny Awards.

The awards are given to firms for their accomplishments in innovation and best practices in such categories as:

- New Job Creation
- Best Place to Work
- New Product Development and Innovation
- Biggest Breakthrough
- Top Growth
- Global Business

Kaivac will receive its award at a televised program on June 7, 2007, at the Cincinnati Museum Center.

"This is truly a great honor for both Kaivac and our founder, Bob Robinson Sr.," says Tom Morrison, vice president of marketing for Kaivac. "Without question, Bob is an innovator, and under his direction our company and its products have always been viewed as pacesetting."

Continuing as a trendsetter, Kaivac is now directing a great deal of its energy and resources into the science of cleaning, working with the Cleaning Industry Research Institute (CIRI) as well as leading scientists and industry experts to measure, prove, and improve the effectiveness of cleaning.

"We believe this is the new direction for our industry," says Morrison. "We believe the future trend for our industry is developing cleaning products that can be scientifically proven to be effective at protecting health and hygiene, as well as being environmentally responsible."
