TWO MORE KAIVAC PRODUCTS GREEN SEAL CERTIFIED

Kaivac, Inc., developers of the No-Touch Cleaning system, announces two of their best-selling products have now been Green Seal certified.

The two products are:

- KaiBloey, a general-purpose restroom cleaner that is exceptionally effective in removing mineral deposits and soap residue. It's also the company's best-selling cleaning chemical.
- KaiPow, a general purpose degreaser often used to clean and remove oily soils such as those found in kitchens and industrial settings.

"Both products have passed the exhausting, if not strenuous, requirements to earn Green Seal's G-37 certification," says Gary Robinson, one of the chemists involved in the certification process. "Additionally, both have shown they are exceptionally effective when used for their designed cleaning task."

Greening the Company

According to Tom Morrison, Vice President of Marketing for Kaivac, the company is actively working to make the No-Touch Cleaning system as green as possible. "Because end customers do not need to 'touch' surfaces to remove soils and contaminants when cleaning with the No-Touch Cleaning system, it has always been considered a healthier way to clean," he says.

Just two months ago, one of the company's other popular cleaning chemicals, KaiO, used for restroom cleaning, was also Green Seal certified.

For more information, visit www.Kaivac.com.

Additionally, Kaivac has published a white paper on green cleaning, *Green Cleaning, Kaivac's Position*, also available online. The paper discusses the company's green philosophy and its plans to help protect the environment.
