Keeping Concrete Green

Concrete floors are growing in popularity because they are considered environmentally responsible.

However, using strong chemicals and coatings on concrete can eliminate all its environmental benefits.

The new Diamabrush Concrete Polishing Floor system from Powr-Flite polishes concrete to the user's desired finish without chemicals or coatings.

And, for a limited time, Powr-Flite is offering a free 17- or 20-inch Millennium floor machine at no charge with the purchase of a complete Diamabrush concrete polishing kit including concrete preparation tool and five polymer blade polishing tools.

For more information, visit www.powr-flite.com, or call toll-free: 800-880-2913.

About Powr-Flite

Established more than 40 years ago, Powr-Flite manufactures a full line of floor-care equipment and carpet extractors for the professional cleaning industry. Based in Fort Worth, TX, the company has over 20 patented designs and its products are recognized throughout the world for their innovation, durability, quality and performance. Their products are marketed directly to end-use customers as well as through distributors throughout the North America, Europe and the Far East.
