### **New Wand: Half the Weight, Twice the Performance**

U.S. Products introduces the new Evolution carpet wand—the first and only rotationally molded carpet wand on the market.

The fact that it is rotationally molded means the wand is exceptionally lightweight. In fact, the Evolution weighs only 6.5 pounds, about half the weight of conventional wands, making it easier to work with and helping to reduce worker fatigue.

The glide receiver and vacuum tube are made of strong but light aircraft aluminum. And the hearty, stainless steel solution line and fittings can withstand up to 3,000 psi.
