Press release date: October 11, 2011

CFR, manufacturer of recycling carpet extractors, introduces the ECO-500 AW Series, the next generation of the popular ECO-500 machines.

The new machine has a completely re-engineered vacuum motor with a number of advanced features to improve cleaning performance, reduce energy needs, and keep the machine cooler and quieter during operation. The device also has new moisture shields that protect internal components.

The result: The vacuum motor lasts three to five times longer than traditional motors, performance and productivity are improved, and downtime is reduced significantly.

About CFR, a Tacony Company

CFR designs and manufactures a complete range of eco-friendly carpet cleaning systems and high performance specialty tools with an innovative, patented technology that is radically different from other carpet cleaning systems. Continuous Flow Recycling

(CFR) technology provides superior moisture-controlled cleaning, faster drying times, and increased cleaning productivity that is unmatched compared to standard carpet extractors on the market today. Through a state-of-the-art recycling filtration system, coupled with moisture-controlled atomization wand technology to minimize carpet moisture, CFR is the Greenest carpet cleaning system in the industry today.
