

Powr-Flite's medium-sized, walk-behind, self-contained Prowler carpet extractor, the PFX900S, is designed for use in moderate-sized offices, schools, health care centers and hotels. This compact system has separate vacuum, brush and pump switches, giving the operator greater control over all carpet cleaning tasks. The Prowler is powerful with a three-stage vacuum motor for maximum recovery and a 1,300 revolutions per minute (RPM) floating brush head for optimal agitation, leaving carpets cleaner and healthier than comparable systems.
