**HOLD THAT SOIL**

The KaiZen, a smaller version of the popular KaiVac machine, both part of the No-Touch Cleaning™ system developed by Kaivac Inc., is said to be ideal for smaller facilities that require powerful cleaning but are a little tight on space.

The KaiZen comes with a quick-attaching wet/dry vacuum system that incorporates an aquatic "air scrubber" which suspends soils, contaminants and other impurities in water for dust-free exhaust. This helps protect the health of the user and indoor air quality as well.

For more information, contact Kaivac at 1-800-287-1136 or visit the company's web site at [www.kaivac.com](http://www.kaivac.com).
