USA

Keeping the "U" Filled

Many people do not realize that the "U" design found in a pipe under a drain is a trap. Its purpose: to keep sewer odors from escaping, negatively impacting indoor air quality.

As long as the U has water in it, it works fine. However, often the water evaporates, and that's when malodors become a problem.

This can all be prevented by adding EverPrime® into drains. Developed by Waterless Co, EverPrime prevents traps from drying out, is simple to use, and lasts for months.

For more information, visit www.waterless.com, or call toll-free: 800-244-6364.
