

Pro-Link release

3/18/2010 9:44:51 AM

Canton, MA – Pro-Link, Inc., is pleased to announce that the United States Department of Agriculture’s BioPreferredSM Program has selected the company’s General Purpose Cleaner as [the Designated BioPreferredSM Item of the Month](#).

[Pro-Link](#) is a national jansan marketing and buying group. The company recently introduced the BioLink line of cleaning chemicals which are biobased and certified Green.

This means they are made with natural, renewable resources such as soybeans, coconuts, and corn rather than petroleum or alcohol. They have also been formulated in partnership with the U.S. Environmental Protection Agency’s [Design for the Environment \(DfE\)](#) formulation initiative.

The General Purpose Cleaner selected as the item of the month is designed to be used for a variety of cleaning tasks and on a wide range of surfaces, including floors.

According to Diane Mahana, Marketing Manager for Pro-Link, in addition to the general purpose cleaner, the new BioLink line also includes:

- Glass cleaner
- Bath and toilet bowl cleaner
- Degreaser
- Specialty cleaners such as furniture polish, stainless steel cleaner and graffiti remover.

The goal of the federal BioPreferredSM program is to increase the purchase and use of biobased products made from biological or renewable agricultural materials. Pro-Link’s BioLink line is now available to Pro-Link members and their customers throughout the country.
