### **SCHOOL SAYS NO TO GENDER BENDERS**

Custodians at Burnaby schools, British Columbia, Canada, one of Canada's larger school systems, are now using *only* Green-certified cleaners to clean the districts schools and offices.

One reason for the change is that the district discovered a number of the conventional cleaners contain nonylphenol ethoxylates, known to cause birth defects and possibly change hormone levels in pregnant women.

The chemical has even been called a "gender bender," because it is known to "feminize" male fish by inhibiting male hormones from developing in the fetus.

The school district switched to using only EcoLogo-certified cleaners and only those made by Enviro-Solutions, a leading manufacturer of Green cleaning chemicals and products.

But do the new Green chemicals work?

Health and Safety Officer Terry Gomez says the school custodians now prefer the Enviro-Solutions products. “They find them equally effective to the [conventional] cleaners they were using before.”

And another benefit: because they are highly concentrated, they are more cost effective to boot.

---

### **About Enviro-Solutions, Inc.**

Enviro-Solutions is a leading manufacturer of environmentally preferable cleaning products. An ISO-9001 certified company, Enviro-Solutions was established in 1994 with very focused goals: To develop and market a superior line of environmentally preferable cleaning products and solutions. Using advanced technology, the company manufactures products that offer proven safety, health, and environment benefits without sacrificing product performance and are competitively in price.
