

## **New Environmentally Preferable Soybean Urinals Introduced**

*A new line of environmentally preferable No-Flush™ urinals made of approximately 30 percent soybean resin have just been introduced. The manufacturer adds that the soy bean resin percentages will likely increase as the manufacturing technology evolves.*

Vista, CA ([PRWeb](#)) October 5, 2008 -- Waterless Co LLC urinals introduces a new line of environmentally preferable No-Flush™ urinals made of approximately 30 percent soybean resin. The company adds that the percentages will likely increase as the manufacturing technology evolves.

The High Performance Composite (HPC) urinal models look and function just as its other waterless urinals do, says Niki Bradley, marketing manager for Waterless Co. LLC.

Users will notice no appearance or functionality difference. However, each urinal will come with a label stating that it is made partially with soybean resin.

### More and More Uses for Soybeans

Soybean plants are hardy plants that grow all over the world, which makes them one of the earth's most sustainable plants and scientists have developed a variety of commercial uses for soybean resin.

For instance, some inks and colored markers now contain soy, replacing the petroleum-based oils that are traditionally used for these products. Soy is also used in fuel. Referred to as biodiesel, this fuel is used in cars as well as in buses and boats. And, biodiesel burns cleanly, making it the only alternative fuel to have successfully completed the health effects testing requirements of the Clean Air Act.

"The idea of using soybean resin to help manufacture urinals evolved a few years ago as company engineers were looking to for new ways to improve the current product line and help protect the environment." says Bradley, Marketing Director for Waterless Co. "Waterless No-Flush™ urinals are already environmentally responsible and efficient; they can save as much as 40,000 gallons of water annually per urinal and reduce maintenance"

According to Bradley, the U.S.-made HPC urinals are being delivered to U.S. distributors now. The company also plans to market the urinals in other parts of the world.

### About Waterless

Waterless Co. LLC has established a reputation as an innovative manufacturer, serving the building, plumbing, and janitorial industry for more than 18 years. Based in Vista, California, Waterless Co. offers expertise in water conservation and quality, high-efficiency products for building owners with a full line of Waterless No-Flush™ urinals, cleaning liquids, and cost-saving accessories. Visit them at [www.waterless.com](http://www.waterless.com).
