Strange Carpet Cleaning Terms Everyone Should Know ***Top Ten List of Unusual Carpet Cleaning Words***

Coeur d'Alene, ID - June 15, 2010 - As in many industries, the carpet cleaning industry has its own jargon to address a variety of related issues.

[U.S. Products](#), manufacturers of professional carpet cleaning equipment, has put together a "Top Ten" list of these carpet cleaning terms with a special emphasis on some of the oddest-sounding ones, according to Nick Wiebe, Marketing Manager for U.S. Products and HydraMaster.

Here is Wiebe's *Top Ten List of Unusual Carpet Cleaning Words*:

1. **Bone scraper.** This is a blade-like tool typically made of bone or plastic used to remove or loosen soils or material coated on carpets.
2. **Feather-in.** To feather in is to use a bone scraper (or similar tool) to work a stain remover or chemical agent into carpet fibers.
3. **Fume fading.** This is a loss of color in carpets. Gas fumes released from furnaces can cause fume fading.
4. **Clouding.** Clouding is usually caused by overwetting the carpet. Essentially, moisture and chemical residue from past cleanings wick up (move up) to the top of the carpet, causing a cloudy look.
5. **Browning.** Closely related to clouding, browning occurs when soils in carpet fibers wick up to the top of the carpet.

6. **Fluffing.** If loose fibers appear on the surface of the carpet before or after cleaning, it is referred to as fluffing.

7. **P.O.G.** This is a type of solvent used to remove paint, oil, or grease from carpets.

8. **Digester.** An organic enzyme used to break down organic stains is called a digester.

9. **Sequestrate.** This is a chemical agent that helps reduce water hardness.

10. **Builder.** Also called “builder material,” builder is added to cleaning solution to soften water and increase the solution’s effectiveness.

“There is also a very common term that needs explaining, and that is low-moisture extractor technology,” adds Wiebe. “It is used but not fully understood. A key criterion of a low-moisture extractor is that carpets dry in two to four hours.”
