The Burnisher for the New Millennium

Powr-Flite introduces the 20-inch Millennium Electric burnisher, available in 1200, 1600 and 2,000 rpm models.

Millennium Electric provides optimum results with all types of floor surfaces, finishes, and burnishing pads.

This machine has a patented, super-durable, rotational-molded one-piece housing that absorbs vibrations, improving operation and ease of use and enhancing worker productivity.

The Millennium also has precision-balanced weight distribution. This eliminates the need for a compensation center or front-mount caster, again adding to ease of use and helping you provide the high-gloss shine your customers want.

For more information, visit www.powr-flite.com, or call toll-free: 800-880-3913.

About Powr-Flite

Established more than 40 years ago, Powr-Flite manufactures a full line of floor-care equipment and carpet extractors for the professional cleaning industry. Based in Fort Worth, TX, the company has over 20 patented designs and its products are recognized throughout the world for their innovation, durability, quality and performance. Their products are marketed directly to end-use customers as well as through distributors throughout the North America, Europe and the Far East.
