

Lightweight labor saver: Tornado® PV 6 Pac-Vac

Tornado introduces a backpack that's light, powerful, and green. The PV 6 Pac-Vac backpack vacuum weighs less than 11 pounds and has a quiet-yet-powerful 1.9-hp vacuum motor generating 90 inches of lift and airflow of 120 cfm. The PV 6 Pac-Vac is a true-HEPA machine. Not only does the HEPA exhaust filter trap more than 99.9 percent of contaminants from becoming airborne, the entire casing of the machine is airtight, preventing dust and soils from escaping. The housing is designed to eliminate heat transference. It also has a vented, ergonomically designed back plate for enhanced comfort.
