

USDA Spotlights Pro-Link Cleaner

March 17, 2010

CANTON, MA -- Pro-Link, Inc., a national jan-san marketing and buying group, has announced that the USDA has selected its general purpose cleaner as the Designated BioPreferred Item of the month.

The company recently introduced the BioLink line of cleaning chemicals, which are biobased and certified green, meaning they are made with natural, renewable resources such as soybeans, coconuts, and corn rather than petroleum or alcohol.

They have also been formulated in partnership with the U.S. EPA's Design for the Environment (DfE) formulation initiative.

The goal of the federal BioPreferred program is to increase the purchase and use of biobased products made from biological or renewable agricultural materials.

The General Purpose Cleaner selected as the item of the month is designed to be used for a variety of cleaning tasks and on a wide range of surfaces, including floors.

In addition to the general purpose cleaner, the new BioLink line also includes:

- Glass cleaner,
- Bath and toilet bowl cleaner,
- Degreaser, and
- Specialty cleaners such as furniture polish, stainless steel cleaner and graffiti remover.

Pro-Link's BioLink line is now available to Pro-Link members and their customers throughout the country.

Founded in 1984, Pro-Link Inc. is a national full-service janitorial supply, marketing, and buying

organization. Based in Canton, MA, it has more than 70 members and over 100 distribution points throughout the United States.
