**With or without water
 October 1st 2011**

Waterless Co. has introduced 'one of the easiest ways to clean virtually all no-water as well as water-using urinals,' with it's NviroClean cleaner.

With NviroClean there is no scrubbing and no wiping - ending one of the nastiest cleaning jobs in any facility, says the company.

NviroClean is simply sprayed onto the inside surface of the urinal and the job is done, leaving urinals clean and healthy.

Further, prolonged use assists in the reduction of unsightly buildups at the base of both urinal systems, and may extend the life of the trap on waterless units.

...isn't it time everyone benefitted?
