## Green & Clean

### Waterless Urinals are constructed with soybean resin.

---

[Click Here to Enlarge Picture](#)

**September 24, 2010** - High Performance Composite urinals, made with up to 30% of ENVIREZ® soybean-based resin, come in 8 models: Kalahari(TM), Sonora(TM), Anza(TM), Del Mar(TM), Del Casa(TM), and Santa Fe(TM). Each has 2 in. interior drain line to facilitate cleaning and does not need to be removed from wall for snaking. Use of soybean resin in these ADA-compliant urinals conserves petroleum and potentially reduces greenhouse gases. All urinals are available in white and other colors.

**Contacts:** [View detailed contact information.](#)

# World's First Urinal Made of Soybean Resin... and Proud of It!

---

## Original Press Release

### Waterless Co.

1050 Joshua Way  
Vista, CA, 92081, USA

Waterless Co., Inc., offers eight different waterless High Performance Composite urinals made partially (up to 30 percent) of ENVIREZ®, a soybean-based resin.

Using soybean resin saves petroleum and potentially reduces greenhouse gases.

These waterless urinals are ADA compliant and so durable that they perform flawlessly in the most challenging environments.

All have a two-inch interior drain line for easy line cleaning, and they do not need to be removed from the wall for snaking, saving time and money.

They are available in white and other colors.

For more information, visit [www.waterless.com](http://www.waterless.com), or call toll-free: 800-244-6364.

### About Waterless

Waterless Co. LLC., has established a reputation as an innovative manufacturer, serving the building, plumbing, and janitorial industry for over 18 years. Based in Vista, Ca, Waterless Co. offers quality, innovation and expertise in water conservation and high efficiency products for building owners with a full line of Waterless No-Flush urinals, cleaning liquids, and cost saving accessories. ## Green & Clean

### Dual Red/White LED Beacon operates continuously up to 10 years.

---

**September 24, 2010** - Leveraging Cree white and red LEDs, Model L-864/L-865 features 8 in. profile, making it suitable for radio and cell towers. Strobe beacon delivers 20,000 candela during daylight operation, consuming just 90 W. For nighttime operation, white or red strings deliver 2,000 candela each at 35 and 24 W, respectively, to meet FAA and FCC regulations. Power supply/control box can be located up to 550 ft from light engine. Operating from -40 to +131°F, beacon withstands harsh weather elements.

### Dialight Debuts World's Smallest Dual Red/White LED Beacon

---

#### Original Press Release

#### Dialight Corp.

1501 Route 34 South  
Farmingdale, NJ, 07727, USA

Energy-Saving, Long-Life LEDs Offer 95% Greater Efficiency than Xenon Technology;  
Up to 10 Years of Reliable Operation Slash Maintenance Costs for Tower Owners

Farmingdale, NJ - Dialight (LSE: DIA.L), an innovative global leader in LED lighting technology, today unveiled its groundbreaking new all-LED L-864/L-865 flashing dual

(white/red) strobe beacon featuring the lowest-profile, lightest-weight flash head on the market for reduced wind load and ease of installation on radio and cell towers and chimney stacks.

At just under 8 inches in total vertical height and only 26 pounds-about one-third the height and weight of traditional Xenon units-the new medium-intensity white strobe and red beacon offers 95 percent greater operating efficiency than Xenon and represents a quantum leap in LED obstruction lighting technology. In addition to its ultra-low profile and single-level design, this latest generation of Dialight's LED industry-leading beacon design leverages Cree XPG and Cree XPE white and red LEDs for the ultimate in energy efficiency and long-life.

"This game-changing product clearly demonstrates just how far LED technology has come, allowing us to deliver the brightest, most energy-efficient lighting technology at a fraction of the size compared to traditional Xenon units," said Roy Burton, Dialight's Group Chief Executive. "This unit requires little or no maintenance for up to 10 years of reliable life, virtually eliminating maintenance costs and the associated risks of flash-tube change out."

The Dual L-864/L-865 LED beacon delivers 20,000 candela (cd) during daylight operation, consuming just 90 watts. For nighttime operation, white or red strings deliver 2,000 cd each at 35 watts and 25 watts respectively, to aptly meet FAA and FCC regulations at a lower total cost of operation.

For operational convenience, the power supply/control box can safely be located up to 550 feet from the light engine, at the base of the tower for example. The unit is compatible with non-Dialight GPS synchronization devices and supports multiple unit synchronization from a single controller.

With its low profile, the shock- and vibration-resistant unit is built to withstand harsh weather elements in all environments with efficient and reliable operation at temperatures ranging from -40°F to +131°F.

Backed by Dialight's exclusive 5-year warranty-the longest in the industry-the Dual L-864/L-865 LED beacon consistently delivers up to 10 years of continuous operational life to guard against unexpected outages, the associated penalties and exorbitant

maintenance costs.

### Extended Life LED Luminaire mounts on walls, ceilings.

---

**September 24, 2010** - Offered in 11 and 22 W versions, DuroSite(TM) Series LED Wallpack Luminaire is rated for 100-277 Vac input and has rated lifespan of 10+ years for use in industrial and commercial applications. Powder-coated aluminum fixture, designed for ceiling or standard 30° wall mounting with brackets, complies with all standard ratings and certifications. Resistant to shock and vibration, solid-state design weighs 9 lb and creates almost no light spill.

**Contacts:** [View detailed contact information.](#)

### Dialight Introduces New DuroSite(TM) Series LED Wallpack Fixture

---

#### Original Press Release

#### Dialight Corp.

1501 Route 34 South  
Farmingdale, NJ, 07727, USA

Rugged, Low-Profile RoHS-Compliant Fixture Designed to Replace High Pressure Sodium, Metal Halide, Incandescent and Fluorescent Fixtures in Industrial and Commercial Applications.

Farmingdale, NJ - Dialight (LSE: DIA.L), an innovative global leader in LED lighting

technology, today introduced its new DuroSite Series LED Wallpack Luminaire offering superior energy savings and long-life performance with dramatically less maintenance than conventional solutions for industrial and commercial applications.

With its low profile and compact design, the powder-coated aluminum wallpack luminaire is fully compliant with all standard ratings and certifications that make it highly suited for stairwells, platforms, exits, walkways, building exteriors, tunnels, subways and other confined or hard-to-access spaces. The fixture is IP66, IP67, IK04, UL1598 (for wet locations) and UL1598A (for marine applications) rated, as well as NEMA 4X and RoHS compliant.

Backed by Dialight's exclusive five year warranty for continuous operation, the DuroSite LED Wallpack also features instant on/off operation, enabling greater operating efficiency and an extended lifespan of more than 10 years, even in the most demanding applications. That means the DuroSite fixture can last up to three times longer than traditional HID fixtures and nearly twice as long as florescent solutions.

Rated for input voltage of 100-277 VAC, the DuroSite LED Wallpack fixture offers high luminous efficacy combined with low power consumption. The fixture is available in both 11-watt and 22-watt versions and is completely free of hazardous materials, including mercury, and creates almost no light spill.

Weighing in at just nine pounds, the DuroSite Wallpack fixture is designed for ceiling or standard 30-degree wall mounting brackets. With a rugged, solid-state design that makes the luminaire resistant to shock and vibration, the DuroSite luminaire offers a high level of versatility and reliability with superior ease of installation.

### Multimodal LED Driver suits coin cell-powered backlighting.

[Click Here to Enlarge Picture](#)

**September 23, 2010** - Supplied in 3 x 3 x 0.8 mm package, CAT3661 single-channel Quad-Mode(TM) LED Driver supports 2.0-5.5 V inputs, can drive one LED backlight with up to 5 mA current, and achieves 92% peak efficiency. Soft-start current limiting and short-circuit protection enable use in equipment powered by coin cell batteries, while low-noise input ripple and constant switching frequency allow use of small external ceramic capacitors. Applications include ULP LED backlighting in portable medical equipment.

**Contacts:** [View detailed contact information.](#)

# ON Semiconductor Introduces Low Power LED Driver Optimized for Coin Cell Powered Backlighting Applications

---

## Original Press Release

### ON Semiconductor, LLC

5005 E. McDowell Rd.

Phoenix, AZ, 85008, USA

Ultra-small CAT3661 provides up to 92 percent efficiency to extend battery life in a wide range of ultra low power, portable handheld LED applications

PHOENIX, Ariz. - ON Semiconductor (Nasdaq: ONNN) a premier supplier of high performance, energy efficient silicon solutions for green electronics today introduced the CAT3661 - a new one-channel Quad-Mode(TM) LED Driver for ultra low power LED applications such as portable handheld medical equipment.

"High efficiency and small size are often top of the agenda for designers of handheld electronics equipment," said Anthony Russell, director of LED Power Products, ON Semiconductor. "The CAT3661 low power Quad-Mode LED driver utilizes patented technology to fully address these needs and supports customers in launching new battery powered product designs that meet the needs of end users by combining small form factor and long battery life."

The CAT3661, which uses a patented architecture and integrates fault protection and fault diagnostics, is able to drive a single LED backlight with a current of up to 5 mA. Soft-start current limiting and short-circuit protection make the new device ideal for use in equipment powered by coin cell batteries. Typical applications include low power backlighting for LCDs and backlighting for a wide range of portable handheld devices including medical equipment.

Packaged in a 16-lead TQFN package measuring just 3 mm x 3 mm x 0.8 mm high, the CAT3661 provides a valuable solution for engineers working on new designs where available board space is limited. Space as well as overall system cost savings are further enhanced due to the fact that the low noise input ripple and constant switching frequency

of the new device allow the use of small external ceramic capacitors. The quad-mode charge pump supports a wide range of input voltages from 2.0 V to 5.5 V and also helps the CAT3661 achieve peak efficiency levels of up to 92 percent - up to 10 percent higher than traditional high efficiency 1.5x tri-mode charge pumps. A typical quiescent current of just 150  $\mu$ A across all operating modes at full load and a zero current shutdown help reduce power consumption and ensure that application battery life is maximized.

### Packaging and Pricing

The CAT3661 is offered in a 16-lead Pb-free TQFN package. Pricing for these devices is \$0.86 per unit in 10,000 unit quantities.

### Upcoming Events

ON Semiconductor will be exhibiting its energy efficient lighting solutions at the Strategies in Light Europe conference Sept. 27-29 in Frankfurt, Germany.

### About ON Semiconductor

ON Semiconductor (Nasdaq: ONNN) is a premier supplier of high performance, energy efficient, silicon solutions for green electronics. The company's broad portfolio of power and signal management, logic, discrete and custom devices helps customers efficiently solve their design challenges in automotive, communications, computing, consumer, industrial, LED lighting, medical, military/aerospace and power applications. ON Semiconductor operates a world-class, value-added supply chain and a network of manufacturing facilities, sales offices and design centers in key markets throughout North America, Europe, and the Asia Pacific regions. ### Urinal Trap Liquid prevents sewer vapor odor ingress.

---

[Click Here to Enlarge Picture](#)

**March 10, 2010** - Designed to work with EcoTrap® system found in all Waterless No-Flush Urinals®, BlueSeal® biodegradable liquid creates barrier that prevents sewer vapors from escaping into restroom atmosphere. When EcoTrap is filled with 3 oz of BlueSeal, urine flows through and under BlueSeal and then down drain. On average, 3 oz of BlueSeal should last 1,500 uses.

**Contacts:** [View detailed contact information.](#)

---

### If It's Blue, You Know It's Sealed

## Original Press Release

### Waterless Co.

1050 Joshua Way  
Vista, CA, 92081, USA

BlueSeal® biodegradable liquid, designed to work with the EcoTrap® system found in all Waterless No-Flush Urinals®, creates a barrier that prevents sewer vapors from escaping into the restroom atmosphere.

BlueSeal is very inexpensive yet amazingly effective; simply pour about 3 ounces into the EcoTrap. The entire process takes about 10 seconds. Urine flows through and under the BlueSeal, then down the drain.

Repeat the process once or twice a month depending on use. Three ounces of BlueSeal should last on average 1,500 uses.

## Spray Cleaner targets urinal systems.

**June 16, 2009** - Developed for both conventional and no-water urinal systems, EnviroClean(TM) safely breaks down urine residue deposits so that they are transported directly down drain or into trap insert. Once sprayed, there is no need to wipe or clean off. Prolonged use of EnviroClean can help minimize buildup, extending no-water trap's life while keeping urinal clean and odor-free.

### More Tools and information

Search for suppliers of

- ▶ [Toilet Bowl Cleaners](#)

designed to effectively and safely break down urine residue deposits so that they are transported directly down the drain or into the trap insert.

Simply spray...then walk away. No need to wipe or clean off; just let EnviroClean do all the work.

Even better, prolonged use of Enviro-Clean may help reduce buildup from developing, effectively extending the no-water trap's life as it keeps the waterless urinal clean, fresh, shiny, and odor free.

For more information, visit [www.waterless.com](http://www.waterless.com), or call toll-free: 800-244-6364.
