Where's the Trigger Valve?

One of the first things users notice about the DriMaster ® upholstery cleaning tool from HydraMaster is that it has no trigger valve. Additionally, it has no spray jet and never needs a second drying pass.

Yet, the heated solution is under constant control thanks to a patented injector bar and slotted vacuum port system. And because it has no trigger valve, the system allows operators to use multiple holding positions, assuring your customer's upholstered furniture is thoroughly cleaned.

The result is effective cleaning without overwetting or heat loss.
