

With the Express Multi-surface floor cleaning system from U.S. Products, one pass is usually all you need for carpets to be thoroughly cleaned. The system has five injection spray jets and five cast, stainless steel vacuum-extraction heads. Together, they facilitate cleaning of all sides of the carpet fiber in a one-step process. And, the system virtually drives itself. The rotary cleaning heads are designed to assist driving and steering wherever you want to go, making the machine exceptionally easy to maneuver.
