**Waterless Co. welcomes you to the ultimate fixture in maintenance reduction and water conservation.**

Our patented No-Flush™ urinals work completely without water or flush valves. The system is touch free, improves restroom sanitation and eliminates odors. Waterless No-Flush™ urinals can be easily installed to all restroom applications. High traffic facilities benefit the most, either through retrofits or in new construction.

A Waterless fixture saves up to 45,000 gallons of water and more per year per urinal and supports our intent for sustainability of our natural resources.

While seemingly an unusual fixture, its simplicity is what convinces. Over the past 13 years Waterless Co. has installed thousands of No-Flush™ urinals in the US and abroad. Some high profile installations include Liberty Island, New York; Petronas Towers, Malaysia; The Jimmy Carter Library, Georgia. Our proven track record for a functional fixture, cost and man hour savings, reduction in maintenance and the improvement of our

environment have made Waterless Co. a leader in this new industry.

Waterless Co. strives to offer premium products, price stability, lowest long term operating costs, exceptional customer service as well as product innovations throughout its product line. Get The Dry Facts!!

### **EnviroGLAS Overview**

EnviroGLAS offers a variety of post-use recycled glass and [porcelain](#) products for decorative and practical use. [Click here](#) for a printable PDF about the EnviroGLAS product line.

**Listen to EnviroGlas's Founder Tim Whaley:**

### **New! EnviroMODE™**

EnviroMODE is a new terrazzo surface made from recycled tubs, sinks and toilets. It's easy to maintain, durable, eco-friendly and beautiful! Available in hundreds of resin colors, the bone-colored porcelain looks fantastic in neutral and earth-toned resins, and really pops in bold resin colors like black, yellow, blue and red, shown here. [Click here](#) for more information on EnviroMODE.

### **EnviroTRAZ**

EnviroTRAZ poured in place recycled glass and [porcelain](#) Terrazzo is one of the most durable, easily maintained flooring systems available today. With endless design and color possibilities, architects and designers can make a unique artistic and ecological statement again and again. EnviroTRAZ maintains relationships with Terrazzo installers across the country to install our patented terrazzo surfaces.

### **EnviroSLAB™**

EnviroSLAB countertops are 1" thick, 27" deep and 84" long (nominal), and can be cut to size by a local installer. These custom-made recycled glass and porcelain Terrazzo surfaces will be the centerpiece of your environmentally friendly kitchen or bathroom.

### **EnviroPLANK™**

EnviroPLANK recycled glass and porcelain Terrazzo floor tiles measure 6" x 36" x 3/8" (nominal). These sustainable and unique planks are laid out in a staggered or random bond fashion, achieving a look similar to that of a wood floor.

### **EnviroSCAPE™**

EnviroSCAPE is the newest trend in decorative, eco-friendly, sustainable landscaping. EnviroGLAS offers a variety of post-use recycled glass and porcelain aggregate options for use as decorative ground cover, aquarium and fountain fill, and anyplace sand is used. The proprietary process produces post-use recycled glass with virtually no sharp edges.

### [EnviroGlas Terrazzo](#)

EnviroGLAS™ Terrazzo is the latest Terrazzo innovation. In lieu of marble and synthetic materials, terrazzo applicators and designers can use an abundance of eco-friendly 100% post-recycled glass for a green building materials alternative. LEED certification conforming.

### [EnviroTRAZ | Green Building Product](#)

Seamless, colorful EnviroTRAZ is one finish that meets all the criteria. EnviroGLAS brings the ancient craft of Terrazzo into the 21st century by combining lightweight epoxy resin with multi-colored glass chips from discarded bottles, mirrors and plate windows and porcelain chips from discarded toilets, sinks and tubs to achieve a surface harder than traditional marble Terrazzo.
